Tower Bridge and the Tower. Immediately below the Tower rises the huge Tower Bridge, doubly spanning the Thames with a footway 142 feet above high water mark, and a carriage-way, whose central span can be raised like a draw-bridge to let large vessels through. The bridge is of steel, the towers cased in stone, and about 10,000 vehicles and 25,000 pedestrians cross it daily. It was erected in 1886-94.
